Pagecloud AI

Introducing Pagecloud AI! A faster way to create content and write your web copy. With the help of AI, you can create blog post and website copy in just a few clicks. Get help with spelling and grammar, rewording text, changing text tone to match your audience, and much more.

Pagecloud AI is currently released in beta. During the beta period, the AI features are free. Using AI may be subject to cost after the beta period.

Use Pagecloud AI inside your website editor

You can use AI directly inside your page editor to help edit, enhance, and improve your copy.

Note: AI can only be used on text inside an Auto Column

To begin, click on the text box you want to edit, and click the sparkles ✨ .

Fix spelling and grammar

Pagecloud AI is great at fixing spelling and grammar. To fix this:

1. **Select the text box** that has the text you want to change.
2. **Click** on the Control strip with the sparkle icon ✨
3. Select **Fix spelling and grammar.**
4. Pagecloud AI will fix your text, it may take a few moments.

If you are not happy with the outcome you can use Undo to go back to the original text.

Make text shorter

Decreases word count to make the text more concise by approximately half. If the text is

already short, the AI will suggest alternative text.

To change the make the text shorter:

1. **Select the text box** that has the text you want to change.
2. **Click** on the Control strip with the sparkle icon ✨⌄
3. Select **Make shorter.**
4. Pagecloud AI will make your text shorter, it may take a few moments.

If you are not happy with the outcome you can use Undo to go back to the original text.

Make text longer

Increases the word count of the text box by approximately 50%.

To change the make the text longer:

1. **Select the text box** that has the text you want to change.
2. **Click** on the Control strip with the sparkle icon ✨⌄
3. Select **Make longer.**
4. Pagecloud AI will make your text longer, it may take a few moments.

If you are not happy with the outcome you can use Undo to go back to the original text.

Change the tone of text

Tone is the author's attitude expressed through words, sentences, and style, shaping how readers perceive the message. Often website content will be written in a consistent tone providing a consistent experience for your site visitors. Pagecloud AI can create and rewrite content in a variety of different tones, see the FAQs at the bottom of this article for a list of tones.

To change the tone of some text:

1. **Select the text box** that has the text you want to change.
2. **Click** on the Control strip with the sparkle icon ✨⌄
3. Select **Change Tone.**
4. The AI Chat window will open.
5. Choose from the list of available tones.

6. AI will re-generate your text in your selected tone.

7. You can then start over, generate more options, change the tone, or cancel.

8. When you are done close the chat window.

If you are not happy with the outcome you can use Undo to go back to the original text.

Simplify language

Pagecloud AI can simplify the selected text to a lower reading level make it easier to read.

To Simplify the language of some text:

1. **Select the text box** that has the text you want to change.

2. **Click** on the Control strip with the sparkle icon

3. Select **Simplify language.**

4. Pagecloud AI will simplify your text, it may take a few moments.

If you are not happy with the outcome you can use Undo to go back to the original text.

Explain this (summarize)

Pagecloud AI can create a helpful, easy to understand explanation/summary of the selected text.

To ask Pagecloud AI to explain something:

1. **Select the text box** that has the text you want to change.

2. **Click** on the Control strip with the sparkle icon

3. Select **Explain this.**

4. The Pagecloud AI chat window will open.

5. The Pagecloud AI will give you a summary of the text.

6. Optional, you can add the summary to the page, start over, or generate more options.

Frequently Asked Questions

What are the different types of Tones?

Casual: A casual tone is informal and relaxed, like how you might talk to a friend. It can be used in writing or speaking to create a sense of approachability and friendliness.

Enthusiastic: An enthusiastic tone is upbeat and energetic, often used to convey excitement or passion about a topic. It can be contagious and inspire others to feel the same way.

Informative: An informative tone is straightforward and factual, often used to convey information without bias or emotion. It is useful for teaching or explaining a subject or topic.

Inspirational: An inspirational tone is uplifting and motivating, often used to encourage and inspire the audience to achieve their goals or reach their full potential. It can be empowering and help people overcome challenges.

Humorous: A humorous tone is amusing or entertaining, often used to create a lighthearted and playful atmosphere. It can make people feel relaxed and happy.

Friendly: A friendly tone is warm and approachable, often used to create a sense of ease and friendliness with the audience. It can help build trust and rapport with others.

Persuasive: A persuasive tone is convincing and compelling, often used to persuade the audience to adopt a particular viewpoint or take a certain action. It can be used in advertising, political speeches, or debates.

Professional: A professional tone is businesslike and authoritative, often used in formal or corporate settings. It is respectful and follows accepted standards of conduct.

Sarcastic: A sarcastic tone is ironic or mocking, often used to express the opposite of what is actually meant. It can be humorous but also rude or insulting if used inappropriately.

Storytelling: A storytelling tone is narrative and descriptive, often used to convey a story or anecdote in a compelling and engaging manner. It can capture the imagination and draw people into the story.

What languages are supported?

Pagecloud AI will do it's best to match the language of the source text when doing tasks like rewording, simplifying and changing tone. When creating new text Pagecloud AI currently defaults to English, more support will be coming soon.

The following languages are supported.

- English

- Spanish (español)

- French (français)

- German (Deutsch)

- Italian (italiano)

- Portuguese (português)

- Dutch (Nederlands)

- Russian (русский)

- Chinese (▆▆)

- 1Japanese (▆▆▆)

- Korean (▆▆▆)

- Arabic (العربية)

- Hindi (■■■■■■)

- Bengali (■■■■■)

- Vietnamese (Tiếng Việt)

- Indonesian (Bahasa Indonesia)

- Turkish (Türkçe)

- Polish (polski)

- Swedish (svenska)

- Norwegian (norsk)

- Danish (dansk)
