

How to Create a Fixed Header Section

A Fixed header will keep your header section in place when visitors scroll up or down your pages.

There are two types of Fixed Headers available.

Sticky - Remains "Stuck" on the top of the page as its own Section.

Fixed - Overlays the Section below it

Set Header Section to be Fixed

1. Set up your [Header Section](#).
 2. Click "Header Style" in the upper left of the header section.
 3. In the [Editing Menu](#), Select the Settings tab.
 4. Change header type from "Standard" to "Fixed"
 5. Click "Save" to save the changes on your page.
 6. Your header section will now be fixed in place while scrolling.
