Embed Facebook Comments

Embedded posts are a simple way to put public comments into the content of your web site or web page.

First you can set up which comment you'd like to embed and copy the embed code through the link below.

https://developers.facebook.com/docs/plugins/embedded-comments/

Once you've copied the embed code you can paste it anywhere on your PageCloud page.

Click Save, and View live to see your embedded post in action
