

# Add a Facebook Page Plugin

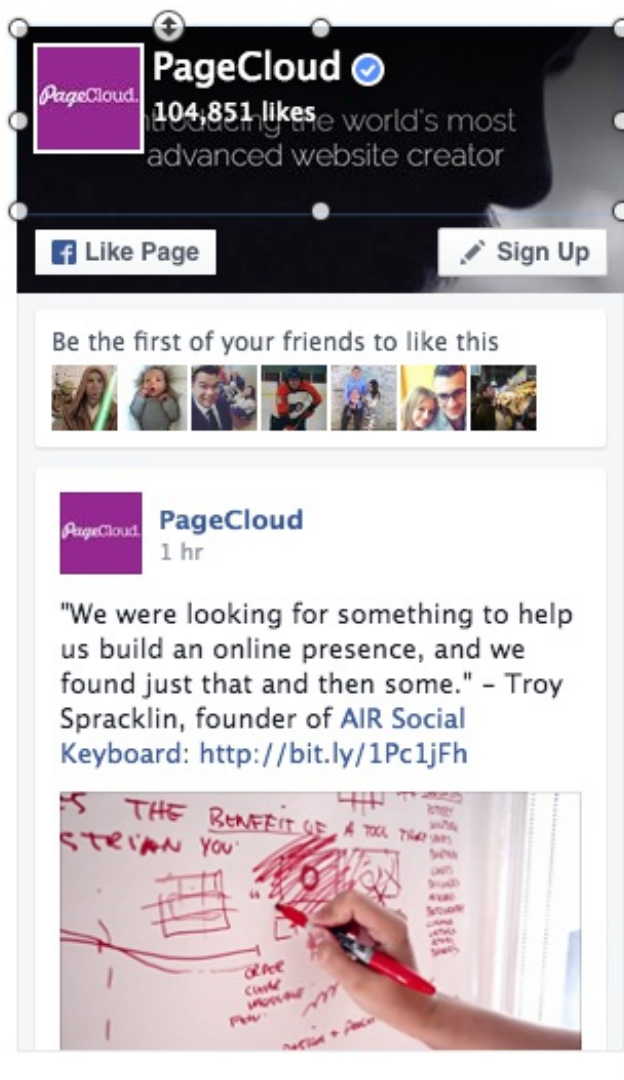

Last Modified on 03/24/2017 2:40 pm EDT

With the Page plugin, you can embed components of your Facebook Page right onto your website.

To start, head to the link below to set up your page plugin embed code.

<https://developers.facebook.com/docs/plugins/page-plugin/>

You can then copy your embed code and paste it directly into your PageCloud site where you'd like it to appear.

The image is a screenshot of a Facebook post from the PageCloud page. At the top, the PageCloud logo is on the left, followed by the name 'PageCloud' with a verified blue checkmark. Below the name, it says '104,851 likes' and 'Introducing the world's most advanced website creator'. There are two buttons: 'Like Page' with a Facebook 'f' icon and 'Sign Up' with a pencil icon. Below this is a section that says 'Be the first of your friends to like this' with a row of eight small profile pictures. The main post content starts with the PageCloud logo and name, followed by '1 hr'. The text of the post reads: '"We were looking for something to help us build an online presence, and we found just that and then some." - Troy Spracklin, founder of AIR Social Keyboard: <http://bit.ly/1Pc1jFh>'. Below the text is a video thumbnail showing a hand drawing on a whiteboard. The whiteboard has the heading 'THE BENEFIT OF A TOOL THAT' and 'STRAIN YOU'. It also lists 'cloud', 'mobile', and 'PWA' with arrows pointing to them. To the right, there is a list of benefits: 'better', 'simpler', 'faster', 'easier', 'more', 'better', 'faster', 'easier', 'more', 'better', 'faster', 'easier', 'more'.
