Adding an Ecwid Category to your page

Last Modified on 07/12/2017 2:33 pm EDT

Ecwid's Categories allow you to display different classes of products right within your PageCloud site to allow for easier navigation for your site's visitors. A great example of when this is useful would be in selling clothing where you may have a Mens, Womens, and Children's line of clothes you want visitors to easily switch between.

You can easily add your ecwid categories to your PageCloud site.

To start, head to your Ecwid Dashboard and navigate to the 'Create Store' section.

You will then want to Click "Other Plateform" which will bring you to the different embed options Ecwid provides.

19%

← Create your online store

So you have a website and it is built with another platform.

Add Ecwid store to your site

You can add your store to any existing website or blog using Ecwid widgets. Your Ecwid store has four widgets – Product Browser, Categories, Mini Cart and Search Box. The Product Browser displays your storefront and is essential to get your store up and running. The other widgets are optional and enhance your store. Follow the steps below to install each of these widgets on your site.

Product Browser	Categories	Mini cart	Search box

① Copy the code shown to the right.

② Log in to your site's backend. Create a new page there or open any existing one for editing.

③ Paste the code on the page where you want the widget to appear. Save and refresh the page.

```
<div id="my-store-9969461"></div>
<div>
<script type="text/javascript"
src="https://app.ecwid.com/script.j
s?
9969461&data_platform=code&data_dat
e=2016-09-21" charset="utf-8">
</script><script
type="text/javascript">
```

Proceed to next step

Here you will find the Categories tab.

Product Browser	**Categories**	Mini cart	Search box

Once Categories is selected, an embed code will appear. Copy that embed code using the CMD+C (on Mac) or CTRL+C (on Windows) shortcut keys.

Next, navigate to your PageCloud site and paste the embed code on your page using the CMD+V (on Mac) or CTRL+V (on Windows) Shortcut keys.

A box will appear on your page that appears empty. Don't worry, when viewed live it will all be there.
