

# Include the Accuweather on your page

Accuweather is a weather forecasting company that provides weather reports for different time frames and different places all around the world.

## Add Accuweather Weather Widget

1. Navigate to the [Accuweather](#) embed page to customize the widget to your liking.
2. Copy the embed code using the CTRL+C (on Windows) or CMD+C (on Mac) shortcut keys.
3. Head to your PageCloud site and paste it using CTRL+V (on Windows) or CMD+V (on Mac) shortcut keys.
4. Click "Save" then click "View Live" to have your Accuweather widget displayed on your site!

Accuweather's embed code may appear as an empty wireframe. Don't worry, when viewed live it will display as expected.
