Attaching a Downloadable File to your Page

Add files such as PDFs on your site for visitors to download.

Attaching a Downloadable File to your Page

1. Drag one or multiple files onto your page.
2. The download button is automatically created, uploaded and linked for you.
3. Click "Save" and "View Live" to save your changes.

> Want to attach a collection of images to be downloadable? Add them to a folder and zip them. Then add the zipped folder onto your page.

Attaching a Downloadable File to new object

You can attach a file you have uploaded to a new object, text, or image.

1. Drag one or multiple files onto your page.
2. The download button is automatically created, uploaded and linked for you.
3. Select the newly created button.
4. In the Editing menu, navigate to the Link tab.
5. Copy the link that appears. This is the link to the specific file you have uploaded.
6. Paste the link in the link tab on the new object, text or image.

7. Click "Save" and "View Live" to save your changes.

Deleting a File from your Page

1. Choose the attachment you'd like to delete.
2. Hit the "Delete" (on Mac) or "Backspace" (on Windows) key on your keyboard.
3. You'll see the words "Delete" at the bottom middle of the screen once this action has occurred.
4. Click "Save" and "View Live" to save your changes.
