

Picking your Page Social Media Image

Some social media services use [Open Graph](#) image tag to define what image is displayed when a post is shared.

Choose an Open Graph Image for a Page

1. Click on the [Left Side Bar](#).
2. Click on "Settings". This will open the Page Settings.
3. Under the General Settings tab, Scroll to the Link Preview Image (Open Graph) section.
4. Click Upload and select an Open Graph image.
5. The Open Graph image for the page has been updated.
6. Click Save to save the pages to your page.

After updating your OpenGraph image, use [Facebook's debugger](#) to properly display your Open Graph image.
