Customizing your Page's Little Icon - Favicon

A favicon is the icon that appears in the browser tab when visiting a site. It allows you to present your unique brand in a professional way.

To Set a Site Wide Favicon

1. From your Sites Dashboard select the site to update.
2. Click the "Site Settings" tab along the top of the page.
3. Under "General Settings" scroll down to "Favicon".
4. Click "Upload Image".
5. Select your favicon image and click "Open".
6. Your site favicon has now been set.

You may need to refresh the browser cache if you notice the Favicon not immediately changing.

For best results, Favicon's should be in a .PNG image format with a minimum size of 48px by 48px and maximum size of 512px by 512px.
