

Apply a custom color to Text and Objects

Apply custom colors to text, objects and more using the Editing menu.

Apply a custom color

1. Select the object you'd like to change the color.
2. Open the "Style" tab in the [Editing Menu](#).
3. Click "Color" to open the color section.
4. You have a few options:
 - Select a color from the available swatches
 - Create and new color using the color selection controls
 - Enter (or paste) your custom color code into the text field below the color controls. You can paste RGB, RGBA, and HEX color code values.
5. Click "Save" and "View Live" to see your changes.

Looking for an App to help find that specific color? Take a look at our [article on Colorzilla](#). This is a Chrome browser extension that provides a color picker tool.
