

Rotate an Object

Rotating an object will give you more flexibility over the look of your photos and text boxes.

Rotate an Object

1. Click on the object you want to rotate.
2. Hold CMD (on Mac) or CTRL (on Windows) and drag on any of the four corners to rotate.
 - Hold SHIFT at the same time to rotate in 45 degree increments
3. Use “R” then “0” to reset the rotation.

You can find even more rotation options available with our keyboard [Shortcuts](#) .
