

Add a Drop Shadow to an Object

Adding a drop shadow effect to your objects can help them stand out from your page.

Add a Shadow to an Object

1. Select an object on your page while in edit mode.
2. Head to the "Style" tab in the [editing menu](#).
3. Click into the "Shadow" submenu.
4. Toggle the Shadow switch to the on position.
5. Configure the remainder of your shadow options.
6. Click "Save" to save the changes.

If you are looking to add a shadow to a non-square object you can take a look at the advanced feature: [Add a custom drop shadow to an object](#)
