

# Add Image Filter

Image filters help adjust the look of your images to make them more stylized.

## Add Image Filter

1. Select an image
2. Head to "Style" tab within the editing menu.
3. Select "Image Filters" and click "Apply" when you see one you like.
4. Click Save to save the changes to the image.

## Remove Image Filter

1. Select the image with filter applied.
  2. Head to "Style" tab within the editing menu.
  3. Select "Remove" from the filter you would like to remove.
  4. Click Save to save the changes to the image.
