

How to Crop an Image

Image cropping allows you to highlight a specific section of an image.

Cropping an Image

1. Select the image you would like to crop
2. Select the crop icon that appears in the control strip in the upper center of the image.
3. Use the slider to zoom into the image. Drag the image to get the exact section visible.
4. Hit Crop to crop the image.
5. Click "Save" to save the changes.

Readjust cropping at anytime by selecting the image and clicking the crop icon.
