

How to multi-select objects

You can select multiple objects at once to help rearrange or apply settings in bulk.

Multi-select objects - Marquee Selection

1. Click down and drag cursor over multiple objects.
2. All objects that were dragged over should now be selected.

Multi-select objects - Keyboard + Click

1. Hold down the CMD key (on Mac) or CTRL key (Windows) and click objects.
2. Object wireframes will appear for all selected objects.

Tip: You can marquee select a number of objects, then add additional objects to the selection by using the keyboard and click method.
