

# Add space below an object (Auto column and Auto groups)

The Space Below tool allows you to add vertical space between objects in an [Auto Column Layout](#) and Auto groups.

The Space Below tool is only available in [Auto Column Layouts](#) and Auto groups. To Adjust spacing between objects in [Manual Column Layouts](#), use the [Squeegee tool](#).

## Using Space Below tool

1. Select an object in an [Auto Column Layout](#) or within an Auto group.
2. Click and drag the Space Below icon on the bottom left of the object's wireframe.
3. Drag up or down to add or reduce the vertical space below the object.

Alternatively you can use the numeric Space below control in the Editing menu Arrange tab.

Mobile Layouts may benefit from more space between objects to view and select on the smaller devices. You can further adjust the space below of an object in [Mobile Layout Builder](#).
