

# Set a Page background

Your page contains all of your Sections and columns within it. You can set a page background color, image or video to have the entire page filled with a specific background.

When a page background color is set, you can adjust the opacity of [Section backgrounds](#) or [Column backgrounds](#) to allow the page background to show through.

## Add a page background color

1. Click on the [Left Side Bar](#).
2. Click on "Settings". This will open the Page Settings.
3. Under the General Settings tab, toggle Set page background.
4. Choose color from the Type dropdown.
5. Select a swatch, choose from the color wheel, or [paste in a custom color](#).
6. Click "Save" to save your page.

## Add a page background image

1. Click on the [Left Side Bar](#).
2. Click on "Settings". This will open the Page Settings.
3. Under the General Settings tab, toggle Set page background.
4. Choose Image from the Type dropdown.
5. Click Upload Image to select an image and set it as a page background.
6. Click "Save" to save your page.

## Add a page background video

1. Click on the [Left Side Bar](#).
  2. Click on "Settings". This will open the Page Settings.
  3. Under the General Settings tab, toggle Set page background.
  4. Choose video from the Type dropdown, then select a video to use:
    - **MP4 Video** - Click Upload Video to select an Mp4 video and set as the page background.
    - **Linked Video** - Paste in a Vimeo or Youtube video link to set as the page background.
  5. Click "Save" to save your page.
